

GOP to Bandung, Indonesia

Background

On 16-20 November 2009, 32 undergraduate and postgraduate students have been participated in Global Outreach Program. This program intended to give global exposure to UTM students. Bandung, Indonesia is our 1st place been visited. Indonesia is one of the nearest countries that have good research & education in Biomedical Engineering and Medicine. Furthermore, Bandung has excellence universities such as **Institut Teknologi Bandung (ITB)** and **Universitas Padjadjaran (UNPAD)** that have Biomedical and Medicine study program. In order to learn about system, culture, education and research activities in these institutes, a visit and discussion in these universities are required. The visit is important for the future collaboration between **UTM** and **ITB, UNPAD** in the area of Biomedical Engineering and Medicine.

Objectives

1. Give students an international exposure on research and education in the area of medicine and medical engineering
2. Explore the culture of other country
3. Initiate international collaboration with institutions in Indonesia

Places/Institutions

1. School of Electrical Engineering and Informatics, **Bandung Institute of Technology**
2. Faculty of Medicine, **Padjajaran University**, Bandung
3. Hospital Hasan Sadikin, Bandung
