

GOP to Technische Universitate Ilmenau (TUIL), Germany

On 31 May 2010 – 7 June 2010

Background

1. Experience in other countries is very important for students
2. Germany is one of the top countries that have good research & education in Biomedical Engineering and Medicine
3. Germany has excellence universities such as TUIL that have Biomedical and Medicine study program
4. In order to learn about system, culture, education and research activities in these institutes, a visit and discussion in universities abroad are required
5. The visit is important for the future collaboration between UTM and TUIL in the area of Biomedical Engineering and Medicine

Objectives

1. Give students an international exposure on research and education in the area of medicine and medical engineering
2. Explore the culture of other country
3. Initiate international collaboration with institutions in Germany

Place/Institution

1. Faculty of Computer Engineering and Automation, Technische Universitat Ilmenau
2. Institute for Biomedical Engineering and Informatic, Technische Universitat Ilmenau

3. Nano Technology Research Laboratory, Technische Universität Ilmenau
